Alzheimer's Dementia Consortium

EPAD Deliverable 4.3

EPAD Cohort study data infrastructure

Executive Summary

This document summarizes the status of the data collection infrastructure on the study. There are multiple components in the data collection area; these will be merged into dataset deliverables and transferred to Aridhia Informatics as periodic data transfers, as outlined in the eCRF Guidelines and non-eCRF Guidelines. Aridhia informatics who manages the EPAD LCS Analytical database will allow any partner to utilise the datasets in an analytical environment to perform data analytics. Also documented is a summary of required documents that describe the data management activities and data flows between Quintiles and all other EPAD partners. The Data Management Plan (DMP) is not a single document but a collection of individual documents that together rules all activities under Quintiles responsibility.
